**DETAILED ACTION**

1. 112 2<sup>nd</sup> paragraph rejection of claims 1 and 5 and 103 rejection of claims 1-6 over JENSEN in view of WADSWORTH have been withdrawn in view of amendments.

***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-7 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 1 recites the limitation "the stream is traveling unenclosed". This new limitation does not appear to be supported by the original disclosure and drawings as figure 1 shows that the glass stream is enclosed by the heating coils. Page 4 line 20 of the original specification also describes that the heating coil is surrounding the glass stream.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by WILLIAMS et al. (US 5,104,432).

WILLIAMS teaches an apparatus for forming fibers of material comprising means for producing a heated stream of molten material (10 in figure 4), means for feeding the stream in a substantially vertically downward direction (17 in figure 4), means for receiving the downwardly directed stream and for forming fibres therefrom (24 in figure 4), and means for effecting a change in the temperature of the stream subsequent to the production thereof (21 and 22 of figure 4). WILLIAMS discloses that fibers are produced (col. 1, lines 5-9). Figure 4 shows that the temperature changing means are means for directly heating the stream by application thereto of electric current (col. 5, lines 58-62) while the stream is traveling unenclosed in a vertically downward direction.

The instant claim does not invoke 112 6<sup>th</sup> paragraph since the written disclosure does not provide structure for the means plus function language.

Regarding claim 2, WILLIAMS discloses that the apparatus may contain a cooling jacket at the outlet of the furnace (col. 3, lines 35-37).

Regarding claim 3, see the discussion of claim 2. WILLIAMS discloses that the cooling jacket may contain air or water (col. 3, lines 35-37).

Regarding claim 4, WILLIAMS discloses that the apparatus may contain flow control means (col. 4 line 65 – col. 5 line 2).

Regarding claim 5, see the discussion of claim 1.

Regarding claim 6, see the discussion of claim 4.

Regarding claim 7, see the discussion of claim 1. Figure 4 shows that the temperature means (21 and 22) are spaced apart from the stream.

***Response to Arguments***

6. Applicant's arguments with respect to claims 1-6 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
